### SWAPS & NOTES

This punch is easy to customize depending on what you have on hand or who you're serving.

Use store-bought lemonade for convenience, or homemade lemonade if you want a fresher citrus flavor.

If you like a less sweet drink, use sparkling water or club soda in place of lemon-lime soda.

For a stronger orange note, freshly squeezed orange juice works beautifully.

### TIPS FOR SUCCESS

The best version of this drink is served very cold, so chill your juices and soda ahead of time if possible.

That helps keep the ice from melting too quickly and watering everything down.

Add the soda last so you keep as much fizz as possible.

If you're making this for a party, wait until just before serving to pour it in.
